The 3d Zastava Level 25X1 The 3d Zastava Level A PFC conscript of the class of 1931 held the position of Komsorg, although this did not exempt him from any border guard duty, training, or details. He was a model border guard soldier, wore the sharp-shooter's medal (otlichnyn strelok) and had been granted two 10-day leaves exclusive of travel time for outstanding border guard service. He would conduct Komsomol meetings at the zastava, collect the monthly dues, and sometimes read political lectures substituting for the Zastava Political Officer.

CONFIDENTIAL 25X1 Explanatory Notes: (See chart page 8) The First Sergeant was an Acting First Sergeant and held the grade of Sergeant. 25X1 One BG private was a communications soldier 2. 25X1 25X1 In the 2d LMG squad there should, in theory, have been three light machinegunners and three assistant light machine 25X1 gunners. Inasmuch as there were only five soldiers assigned to this squad, the latter was short one assistant light 25X1 machine gumner. 25X1 only one or two members
were ever free during any 24-hour period when they were not
asleep. This meant that over 95% of the zastavy personnel 25X1 was continuously on duty.
